EDUTINKER international conference
Technology, Innovation and
New Keys for Educational Resources

4–5th July 2016, Bilbao, Spain

The University of Deusto, as coordinator of the project "Make World: Learning Science through Computational Thinking", financed by the European Commission within the Erasmus+ programme, will host the international conference "EDUTINKER: Technology, Innovation and New Keys for Educational Resources". The conference is organized to bring together leaders and educators from around Europe to focus on topics that impact **STEM Education in primary school**. The Make World project results will also be presented, including experiences from piloting, data analytics for researchers, etc.

The conference will take place at the University of Deusto, Bilbao, Spain on 4th and 5th July 2016.

Keynote speakers

Agueda Gras-Velázquez, Science Programme Manager at European Schoolnet and Scientix project manager

David Cuartielles, Co-founder of the Arduino platform and Teacher at Malmo University

MAKE W RLD
